VERTEX PLUS Magnetometer

- Measured by onboard sensors
- Finer-scale movement data
- Behavior insights from motion data
- Greater Battery efficiency
- Free data visualization tool

MORE INSIGHT, LESS POWER: How Dead Reckoning Complements Traditional GPS

Dead Reckoning – available in Vertex Plus collars – estimates an animal's movement between GPS fixes and complements traditional GPS monitoring by filling in the gaps, providing more complete movement paths and deeper insights into movement behavior, all while conserving battery life.

AVAILABLE OPTIONS

- Can be combined with a video camera up to 4K resolution
- Drop Off: internal or external
- UHF external sensor and UHF ID Tag

SPECIFICATIONS

- Hibernation, mortality & temperature sensors with VHF beacon
- Battery: 1C, 1D, 2D, 3D, 4D, 5D, 7D
- Round or oval shapes
- Access data anywhere with INVENTA mobile app
